

Quiz 4 TensorFlow/Keras

(total 20 points, with 6 points for the last question)

1. Which of the following activities are performed by TensorFlow?

- A. Data automation
- B. Model tracking
- C. Model retraining
- D. Performance monitoring
- E. All of the above

2. How many types of models does Keras provide?

- A. 2
- B. 3
- C. 4
- D. 5

3. Which of the following Keras models is known to be the simplest model and it constitutes a linear set of layers?

- A. Sequential Model
- B. Advanced Model

4. Which of the following methods is used to add layers in a sequential model?

- A. Layers_add()
- B. Add_layers()
- C. Add()
- D. Layers()

5. How many parameters does the compilation process take in Keras?

- A. 3
- B. 5
- C. 9
- D. 6

6. What is LSTM?

- A. Longitude short-term memory
- B. Long short-term memory
- C. Lengthy short-term memory

7. Models with shared layers, multi-outputs, and directed acyclic graphs can be defined using the ____?

- A. Keras functional API
- B. Keras sequential API

8. To implement a densely-connected network, which of the following model gives better results?

- A. Sequential model
- B. Advanced model

9. which Keras layer would you use if you want to reduce overfitting in neural network models?

- A. Pooling layer
- B. Dropout layer
- C. Permute layer
- D. Lambda layer

10. In Keras, "sequential" refers to a ____?

- A. Single layer

- B. Multiple layers
- C. Entire model

11. To train your model in Keras, which of the following methods would you use?

- A. Predict()
- B. Model()
- C. Fit()

12. To predict your model, which of the following methods would you use?

- A. Predict()
- B. Model()
- C. Fit()

13. Which functions in Keras help you to find faults or deviations in the learning process?

- A. Keras optimizer function
- B. Keras metrics
- C. Keras loss function

14. Which of the following permits you to evaluate the performance of your model?

- A. Keras optimizer function
- B. Keras metrics
- C. Keras loss function

15. How many parameters are there in the following Keras neural network model (show your work of calculations)?
